WHO WE ARE

The early days of Umbrella Mobility date back to 2004, when the journey began with the provision of passenger transport through Limousine Car Services. Today, it is one of the most important partners of the German company FlixBus, for which it provides international bus services throughout Europe and is also a major provider of urban and suburban transport in the Czech Republic and Germany. In addition, Umbrella leases high quality coaches for touring and incoming services and offers a full range of travel services.
